Matt,

I do hope we are able to get out to Tower before December, but we are still waiting on our results from the soil borings done by the state contractor. I will be in touch after we have a discussion with the state and tribe about well locations, etc., so you can begin the work plan prep.

Bob,

That sounds like a good idea to me. Unless we get out earlier on the Tower well installation, our next planned mobilization for your TOs will be the next Boivin sampling event on 12/1/15. I'll plan on us have a phone call prior to this event.

Thank you,

--Matt

Matt,

Thanks for the clarification. In the future, it would be good to have a brief phone call to discuss field work so we all know what will be occurring, whether we have revised documents or not. I think there are enough calls in the scope to cover something like this.

Also, thank you for checking up on the sample supplies for Kristen.

Good morning Bob,

I'm afraid that there was never a revised private well sampling plan. When we were putting together the cost estimate for Amendment 1 we asked the question as to whether we needed to revise the plan, since it had just recently been approved as final (we submitted the final hard copies on July 28 and received the request for a revised cost estimate on August 2). Lynn directed us to not revise the private well sampling plan, so we did not include additional hours for this in our cost estimate.

I don't know that this caused the mix-up with the lab containers but it may have contributed to the confusion.

When I talked to Lucas earlier about the sampling that Kristen is going to do he seemed to be well aware that everything (labels, chains of custody, shipping paperwork) had to be filled out as completely as possible, but I will contact CWE again to verify and remind them.

Scott,

A couple items on the Tower project:

I do not believe that I received a final sampling plan for the private well sampling activity with the revised analytes and the added sand point well. CWE had the old plan which may have led to the confusion on the bottle numbers and types.

As you may have heard from CWE, two samples will be collected by Kristen Hanson from LDF when the homeowners are available. These were included in our sample number from our scope and are not additional samples. If it hasn't already been done, please ask CWE to send bottles with labels already made out for these samples. They may contact Kristen directly to get any details they need. I would like everything to be set so Kristen only has to collect the samples and put the time and date on the labels and COC forms, and then ship them to the lab with the shipping forms already filled out.

Thank you,

Bob
